Task: Integrate Interactive Bootstrap Components into Your Page

Objective:

➢ Use Bootstrap's carousel to display images/slides.

➢ Add a modal that opens from a button click.

➢ Create a dropdown menu.

➢ Design a card component with image, title, and text.

➢ Build a form using Bootstrap classes for styling.

Step 1 – Carousel

➢ Add a Bootstrap carousel with 3 images and indicators.

Task: Create Your First Structured Webpage Using Essential HTML Elements

Step 2 – Modal
➢ Include a button that triggers a modal popup with text inside.

Step 3 – Dropdown
➢ Create a simple dropdown menu with 3 items.

Step 4 – Cards
➢ Insert 3 card with an image, title, and description.

Step 5 – Form
➢ Create a short form using Bootstrap classes (form-group, form-control, etc.).

Requirements

➢ Tools: Text editor, browser
➢ File: Continue editing index.html
➢ Bootstrap CDN already linked

Reminder

Bootstrap components rely on JavaScript too—make sure the Bootstrap JS and Popper.js scripts are included before the </body> tag!

THANK YOU
